We empower businesses through technology to become more efficient, optimal and healthy.

Corpora is a **technology company** specializing in **data science** and **Artificial Intelligence**. We implement technology, facilitate data visualization and analysis for decision making, and develop custom artificial intelligence algorithms **for other companies**.

Problema and solution

We focus on solving the problem of **inefficiency in business processes**. We help our clients to improve these processes to allow them to **dedicate more time to innovation and development of new ideas**. We work on projects that seek not only to improve economic efficiency **but also to minimize the environmental impact** of business operations, promoting greener and more sustainable practices.

Products and services

Custom Generative AI

We design models that capture your business's voice and purpose, creating unique copy, proposals, and content that truly resonate with your audience.

Intelligent Agents

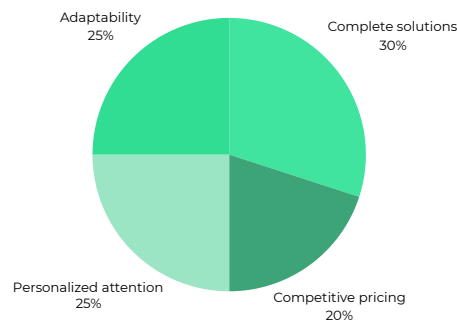

We deploy virtual assistants capable of anticipating needs, automating inquiries, and learning from every interaction to humanize each touchpoint.

Intuitive Data Visualization

We transform your metrics into clear dashboards, so every number tells a story of growth and opportunity.

Diferencial

Our services stand out for their **comprehensiveness**, providing complete solutions ranging from initial analysis to implementation and post-sales support. We offer **personalized attention**, adapting our solutions to the specific needs of each client, which allows us superior **adaptability**. In addition, our **competitive pricing** positions us as an affordable option without compromising quality. This translates into a direct **improvement in efficiency** and cost reduction for our clients, strengthening their ability to innovate and expand in the market.

Información Adicional

- We have a **product area** specialized in developing specific solutions for the real estate sector, designed to improve operational efficiency and optimize processes.
- We are committed to **continuously improving our quality** standards to ensure excellence and customer satisfaction.
- We had experienced an impressive **700% growth by 2023**, reflecting the effectiveness and relevance of our solutions, as well as our commitment to **innovation and adaptability** in an ever-changing market.

Key Company Milestones
