

Perfil

Sector: Industrial technology /
Digital transformation

Product and Service Type:
Engineering, software, automation

Foundation: 2016

Team Members: 22

Technologies: SCADA, IIoT, IA,
Digital Twins, Blockchain,
Cybersecurity, Augmented Reality,
Cognitive Automation

Metrics

Developed Projects: 120

Current Projects: 15

Active Presence Countries:
5 (Argentina, Chile, Perú, México y
EEUU)

Intelligent technology to transform industries with scalable, secure, and customized solutions.

Company

MDN-TEC SA is an Argentine startup specialising in integrating technology for industrial digital transformation. We offer scalable and customised solutions in engineering, software, automation and maintenance, focusing on sectors such as energy, mining, oil and gas, water and manufacturing. Our operations already extend to Argentina and Peru, with plans to expand into Chile, Mexico and Colombia.

Problem and Solution

It is a common challenge for industries to incorporate technologies that improve efficiency, safety and sustainability. MDN-TEC solves this challenge with integrated automation solutions, industrial software, and advanced analytics, tailored to each customer and accompanied by ongoing technical support.

Products and Services

SCADA, IIoT, and Digital Twins4 platforms
Electrical, control, and telecommunications engineering
Industrial automation and predictive maintenance
Technology consulting and OT/IT cybersecurity

Differential

Our company is distinguished by its unique integration of engineering, software, and automation into customised, interoperable solutions, underpinned by a comprehensive, end-to-end approach. We apply emerging technologies and guarantee measurable results in efficiency, time, and costs. The following are our distinguishing features:

- Our comprehensive service offering includes diagnosis, design, implementation and support.
- High interoperability between OT/IT systems.
- Incorporation of emerging technologies: AI, IIoT, Blockchain, advanced cybersecurity.
- Experience in critical sectors: mining, energy, oil & gas, water.

Extra Information

We have specialised technical teams, in-house development capabilities, and an internal innovation line (MDN Innova). Our model is exportable, agile, and adaptable to complex industrial environments.
