The Future of Film Investment is Decentralized..

The Opportunity

Cinema is a \$100B+ global industry — but investing in it has been exclusive, and reserved for a few. **PlotChain changes the game**

What We Do

PlotChain tokenizes film projects, turning each movie into a real, traceable asset. Investors support auteur-driven films with commercial potential and receive revenue shares from distribution — streaming, licensing, sales, and more — over a 5-year window. All recorded on-chain.

Business Model: ——— **10%** commission on capital raised, **20%** share of net profits
5% fee on primary NFT sales, **2.5%** on secondary.
