# Blockadia

Environmental Consulting • Sustainability • Chemical Safety • IT Tools

At Blockadia, we believe sustainability is a shared responsibility. We work collaboratively with our clients to turn environmental and safety compliance into a true strategic advantage. Our technological solutions automate processes, optimize data management, and enable the transition towards more responsible, efficient, and sustainable business models.

Environment

• Environmental management before APRA (CABA) & OPDS (Buenos Aires Province)
• Waste management
• Noise measurements
• Carbon footprint studies
• GIS reporting & analysis
• Environmental awareness training

Chemical Safety

• Implementation of the Globally Harmonized System (RES SRT 801/15)
• Safety Data Sheet (SDS) preparation with eQgest
• eQgest software sales
• Training in chemical hazards and GHS regulations

Sustainability & Renewable Energy

• Solar project pre-feasibility studies (photovoltaic & thermal)
• Resource analysis: solar, wind, and biomass

Software & Development

• eQgest: platform for preparing and managing Safety Data Sheets (SDS)
• Development of customized systems and software tailored to each client's needs

Why Choose Us?

• Technical and regulatory expertise
• Proprietary, efficient, and secure technology
• Close support throughout the process
• Integrated solutions in multiple countries
