TAMAILLI S.A. develops **SAVIA**, a 100% web-based ERP system for travel agencies and tour operators. Our business units include tourism-focused technology, process automation, and B2B digital solutions..

Problem and Solution

Most travel agencies manage their operations using multiple disconnected tools, leading to duplicated tasks, errors, and loss of critical information.

SAVIA solves this by centralizing all operations in a single system: quotations, bookings, accounting, e-invoicing, automated communication, and financial management. Our solution increases productivity, reduces errors, and allows businesses to scale without hiring more staff.

Product and Services

Main Product:

SAVIA ERP BackOffice Web

Fully cloud-based, with automatic updates and continuous support..

Core Features:

- Quotation and pre-sale tracking
- Comprehensive trip file management
- Automatic voucher generation and document handling
- Financial and accounting control
- Integrated e-invoicing (ARS, USD, EUR)
- Group and seat management
- Integration with GDS (Amadeus, Sabre, Starlings), WhatsApp, APIs, and more
- Corporate client portal

Differentiator

SAVIA is the only platform of its kind that:

Adapts to both retail agencies and wholesale tour operators

Automates the entire sales and post-sales cycle

Offers automated communication via WhatsApp and email

Integrates directly with consolidators, suppliers, and websites

Scales across multiple countries with local tax and accounting rules

Enables agencies to focus on selling and enhancing customer experience, not operational tasks
