CUMBRESOFT

ORGANIZATIONS CLOSER TO CITIZENS

We provide agile and personalized technological solutions for digital transformation, through electronic automation and process reengineering.

Company

Through the Sayges Ecosystem and the BPM discipline, we promote the digital and cultural transformation of public and private organizations, achieving greater efficiency, transparency, agility, and productivity.

Triple impact

1) More productive organizations

- Reduction of waiting times.
- Greater operational efficiency.
- Costs reduction.
- Single window for procedures and services.
- More collaborative and participatory administration.

2) Citizen and organizational staff empowerment

- Personnel capabilities aimed at tasks with greater added value.
- Increased citizen involvement in decision-making.
- Single window: self-managed and easily accessible. space. Allows tracking of procedures or reports.

3) Environmental awareness

- Paper 0
- Online procedures: avoid transfers and reduce your carbon footprint.
- More sustainable present and future.

Sayges Value

- It works with a BPM engine: facilitates effective process management.
- Allows internal and external interoperability.
- Allows integration with pre-existing systems.
- Blockchain security.
- Minimum infrastructure requirements.
- Data analytics: Improves decision-making based on real and verifiable data.
- Intuitive: it has a user-friendly interface for citizens.
