

LEDA SYSTEMS

BY DESITEC S.A.

- 24/7 real-time monitoring.
- Mobile phones visualization.
- On-premise server.
- Friendly user interface.
- Module upgrade and expansion capability.
- Acknowledgment log and audible alarm.

With the LEDA system for remote monitoring and leak detection, you will be able to monitor your station in real time through various components centralized in a single device.

Sensors

We offer a wide range of sensors: liquid, gas, optical discriminator, pressure loss (PLLD), groundwaters, laser, etc.

Telemetry

We use magnetostrictive probes to measure product level, water level, and temperature in storage tanks.
