▶ **POWERING THE FUTURE**

Company

We are a technology company that enables more efficient, accessible, and human connections between organizations, institutions, and the communities they serve.

About us

We are a Latin American tech company (based in Argentina, with operations in Colombia and Paraguay) delivering secure, scalable digital solutions that accelerate workflows, improve UX, and enable data-driven decisions. Leveraging AI and low-code technologies like GeneXus, we ensure fast deployment, deep customization, and high-impact results.

Problem and solutions

Many organizations face slow processes, not very flexible solutions and a digital experience that does not connect with their users. We solve this by creating solutions that are agile, scalable and focused on people and their business.

Our services

- Custom software development for web applications, both Backend and Frontend and applications for Android and iOS mobile devices.
- Process automation and optimization.
- Genexus Support and Consulting.
- Evolutionary maintenance of applications.
- Training.

Digital solutions

We have Web and Mobile solutions for:

- NexoGob → Smart Government.
- Smart meters.
- Digital library through AI.
- My Ticket (document presentation through AI).
- Automatic controls with Machine Learning.
- Vehicle control.
