Your technological partner in the insurance industry, to optimize processes and grow in the digital era.

Company

We are a consulting firm focused on the Latin American insurance industry. We have 20 years of experience in strategy and technology. Our business units include IT Sourcing, Software Factory, Space Cloud, Security, RPA, and Consulting..

Problem and Solution

Insurers face the need to modernize their operations. Kopernicus offers consulting and technology solutions to drive digital transformation, aligning technological strategy with business objectives and ensuring continuous evolution within the industry.

Products and Services

We offer technology consulting services, custom software development, and cloud infrastructure optimization for insurers. We also provide specialized IT talent to meet the needs of companies

Differential

Our added value lies in the fusion of deep experience in the insurance sector with cutting-edge technology. Unlike other solutions, our end-to-end proposal (from strategic consulting to implementation) ensures a complete transformation. This guarantees a perfect alignment between technology and business objectives, maximizing profitability and competitiveness for our clients.

Other information

The company has a team of almost 100 qualified professionals distributed across 3 countries. We use agile methodologies such as Scrum and DevOps, and technologies like AI, big data, and cloud. Our approach creates value with clients by building long-term strategic relationships.

Main milestones of the company
