

We operate in over 10 countries, including Europe and the US, managing more than 20 million shipments through technology without adding vehicles to the streets.

We reimagine logistics operations through innovation and digital optimization.

World-class LogTech, with solutions built on our real operational experience.

Moova began as a last-mile logistics enabler, with technology at the core of our value proposition. Over time, and thanks to accelerated growth, we transformed into a LogTech ecosystem designed to empower logistics operators.

Today, we are a leading LogTech company with presence in Latin America, the US, and Europe. Through a suite of technological solutions, we help our clients digitize and optimize last-mile logistics, transport management, and asset management across multiple industries and markets.

Our technological solutions:

Moova FLOW Truly end-to-end and scalable last mile technology.

Moova GRIP The definitive transport management system (TMS) and control tower for complete logistics control.

Moova EDGE Asset optimization technology for industrial and agro-industrial and operations that combines real-time tracking, delivery capabilities, and geofencing.
