sports, real state, government offices, among  
others.

## Innovation, prospective y continuous improvement

### What makes us different

Our goal is to deliver solutions, no matter what technology or IT process  
is involved. We focus our effort on building quick and scalable data  
products and automations that change the working day of our client.  
We quantify all results, so the client understands the value of change.

### Solutions

Organizations have massive data that require processing for planning  
and management. At BDE we develop and implement Big Data strategies  
to provide evidence-based visualization, analysis, and prediction  
solutions.

We help institutions to take the path towards digital transformation and  
4.0 technologies.
