>dev Factory_
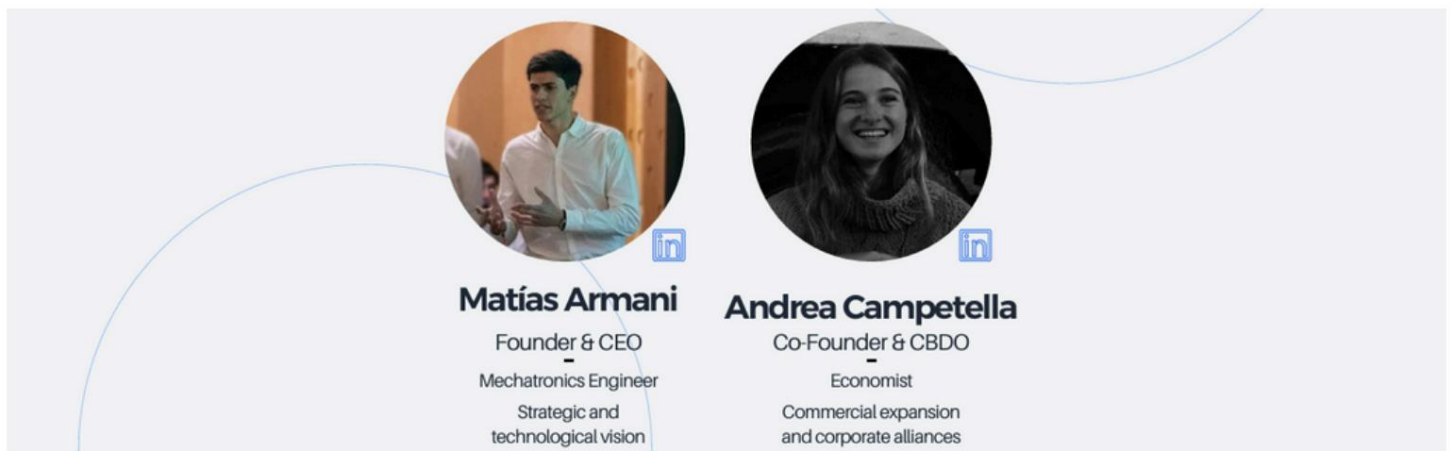

**-We digitize SME operations to optimize
their resources and maximize their competitive potential-**

devFactory offers an **intuitive , AI** - powered , value-chain ERP system for SMEs, featuring genuine custom developments that improve **efficiency. Trusted by over 200 users,** our platform is ready for rapid expansion or deployment in the SaaS market.

Problem: Companies use various, unintegrated Excel spreadsheets and keep records manually. Information is scattered, out of sync across different areas, and time is wasted on repetitive tasks.

Solution: devFactory provides an online platform where all information is stored in one place, accessible in real time. This allows information from different areas to be connected. It also allows for automatic reporting and data analysis. A single, comprehensive, intuitive, and customizable platform, powered by Artificial Intelligence.

Commercial expansion
and corporate alliances

Business model: We work through a monthly subscription type NETFLIX.
We offer three plans: STARTER, PROFESSIONAL, and ENTERPRISE, which are differentiated by the number of collaborators using the platform.

Strategic plan:

- *2025:* Seed round - LATAM Expansion
- 2027: Series A - Globalization
- *2029:* Series B - Aggressive expansion with consolidated PMF
