

DEDICATED AGILE TEAMS

Let's work as a team to
streamline your projects.

WHAT YOU GET

Monthly team dedication that fits your project and budget needs.

100% remote work, no physical space required at your facilities.

Multidisciplinary and **high-performing teams**.

Assigned Team Leader as coordinator and point of contact for the team.

Hourly-based service delivery. Only **executed hours** are taken into account.

A team composed of professionals from **various technological stacks**, adapting to your needs using agile methodologies.

Project monitoring - Operating effectiveness - AI integrated solutions.

Save yourself the time and expense of recruiting technology experts, which can be a draining process.

GREAT INNOVATION STARTS HERE

WHAT ARE DEDICATED AGILE TEAMS?

A **Dedicated Agile Team** is a group of developers who manage long-term projects for startups, SMB and enterprises.

They work full-time with your in-house team to create and develop software, in line with the project they have been hired for.

Tailored project development.

Outsourcing a complete IT team.

Expanding an existing team.

HOW DOES A DEDICATED AGILE TEAM WORK?

1

Client meeting to assess project objectives, timelines, and scope.

2

We choose developers based on their skills. You have the option to onboard them immediately or conduct further interviews to evaluate their experience. You can also add or replace developers as per their knowledge.

3

We initiate the project.

CONFIDENTIALITY AND SECURITY

Outsourcing involves deep immersion into your company, resulting in a significant exchange of critical business and operational information, as well as work teams. Therefore, confidential management of all information is essential.

We sign a tight Non-Disclosure Agreement (NDA) to ensure information security and protect your company's intellectual property.

**Build your project
with our team**
