

seedmatriz

Plan by Plant Agriculture

We are Seed Matriz, an agtech startup established in 2018 dedicated to developing cutting-edge technologies for extensive crop seeds.

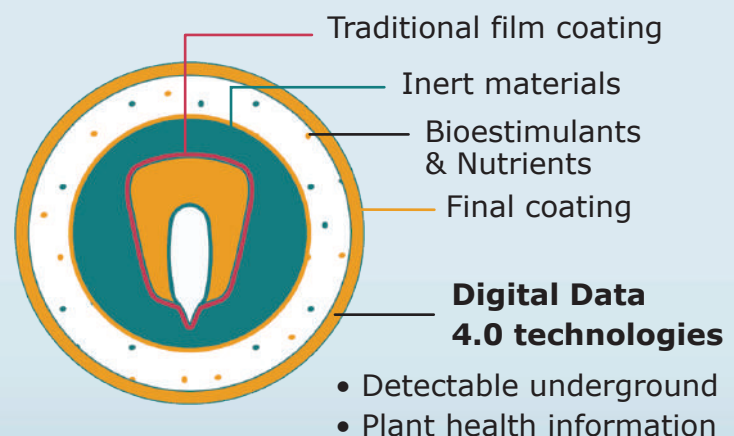

OUR ACHIEVEMENTS

- Industrial seed encapsulation technology.
- On field validation in Argentina & US.
- Fundraising rounds 1 & 2.
- Arch Grants award winners.
- Patent in Argentina & US.
- Commercial traction.
- Softlanding ST. Louis - MO.

THE PROBLEM Film coating technologies

- DON'T improve size, weight and shape of seeds.
- DON'T improve planting quality.
- DON'T allow addition of significant enhancers.
- DON'T avoid phytotoxicity dangers of mixing ingredients.
- DON'T protect seeds from low soil temperature.
- DON'T avoid dust off.
- DON'T protect for excess lack of soil moisture.
- DON'T differentiate the product (commodity).

THE SOLUTION Encapsulation Technology

Proven in Argentina & US
