Vulseek
By Securetia

What is Vulseek?

Vulseek is a **SaaS** (Software as a Service) type cloud software that allows companies or other organizations to **identify possible threats** to their assets (IP Addresses, Domains, Networks, Web Apps and Host Names).

It is a **tool that automates the continuous search for cyberthreats in your assets**, making an intelligent prioritization of the different types of findings and providing graphs that will help you manage them properly.

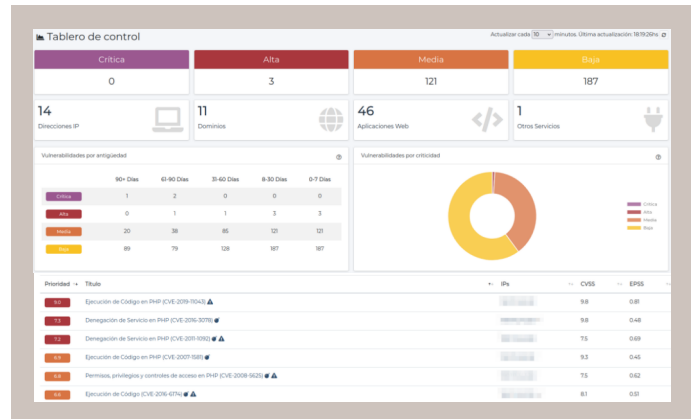

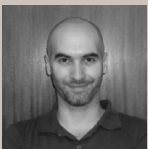

1.658 **Vulnerabilities detected so far**

876 **IP addresses continuously scanned**

Key Team

Javier Vallejos Martínez
Co-Founder of Securetia

Fabian Martinez Portantier
Co-Founder of Securetia

What are the advantages?

Simple   **Fast**   **Continues**

Just by loading the Company Domain **it will show the information in a clear and concise way, exposing the first results in minutes** and continuously analyzing the infrastructure.

Securetia, company with extensive experience in cybersecurity, created Vulseek in 2020
