## Who We Are

---

Zafirus Technologies is a software development company specialized in the healthcare sector. Founded in 2021 in Argentina, with commercial presence in its home country, as well as Uruguay, Mexico, and the United States. We have an interdisciplinary team of 100 highly qualified professionals. Our leadership combines strategic vision, deep knowledge of the healthcare ecosystem, and a constant commitment to technological innovation.

## Problem & Solution

The healthcare system faces slow, fragmented, and inefficient processes. At Zafirus, we offer customized digital solutions that automate tasks, integrate information, and improve decision-making.

Our expertise in HealthTech, certified teams, and ethical approach position us as the ideal partner for agile and sustainable transformation.

## Products & Services

- Custom software development
- Technology diagnostics
- Specialized SaaS products
- Outsourcing

All with an agile, scalable, and adaptable approach for each client.

## Key Differentiators

- Specialization in healthcare, high technical capability, and fast execution
- Certified teams that integrate quickly; proprietary ready-to-use products

## Values & Culture

- Ethics as a guiding principle
- Technology as a tool for social impact
- Changing the healthcare world with the technology of tomorrow

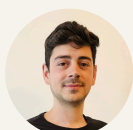

## Key Metrics

- Over 50 active projects currently under development
- Ability to integrate up to 20 certified professionals in less than 30 days
